PROFESSIONAL SUMMARY

MSc Computer Science (Artificial Intelligence) student with a Bachelor's in Computer Applications and internship experience spanning AI, data analytics, and web development. Comfortable working across Python, Java, and Machine Learning, with practical exposure to data-driven decision-making picked up through internships, workshops, and job simulations. Looking to join the Emirates Group Elevate Internship Programme in Strategy, Data & Technology to bring analytical thinking and hands-on technical skills to real business problems.

EDUCATION

MSc Computer Science (Artificial Intelligence)

Expected 2027

Sacred Hearts College, Thevara

Bachelor of Computer Applications (BCA)

2024

Nirmala Arts & Science College, Mulanthuruthy

INTERNSHIP EXPERIENCE

Software Tester Intern

Mar 2025

Soften Technologies, Kadavanthra, Kochi

- Ran manual and automated tests — test case design, functional testing, defect reporting — under the QA team's guidance, and flagged issues to the dev team in order of priority.
- Used Selenium for automated testing and JIRA for defect tracking, following the team's QA process from test plan through to sign-off.

PHP Developer Intern

Jun 2023 – Oct 2023

NOSCE Techno Solutions

- Delivered a live PHP project start to finish, working directly with the team on requirements, build, and rollout.

Artificial Intelligence Intern

Sep 2023 – Oct 2023

Academor, in association with Flutura Business Solutions

- Completed a two-month internship in the AI domain, recognised as an energetic, quick-learning member of the cohort.
- Worked on mentor-guided projects that gave real exposure to how AI is actually applied in industry, not just in theory.

PROJECTS

Zero-Shot Audio-to-Audio Video Dubbing Engine

Python, PyTorch

- Built an end-to-end pipeline that dubs English talking-head videos into Telugu, Malayalam, Japanese, and German, with synced audio and realistic facial animation.
- Translated speech directly with Meta NLLB-200, skipping the usual pivot-language step, and cloned the original speaker's voice using OpenVoice V2's zero-shot cloning, with optional RVC pitch and character conversion.
- Reanimated mouth movement frame-by-frame with Wav2Lip and S3FD face detection, with a manual bounding-box fallback for tricky camera angles.
- Shipped both a browser dashboard with live stage telemetry and a CLI for batch runs; tuned GPU throughput with 480p prescaling and batch sizing to avoid CUDA OOM crashes.

PosePerfect: AI Yoga Posture Detection App

Flutter, Dart, Firebase

- Built a cross-platform app that tracks yoga posture in real time using Google ML Kit's 33 body keypoints, with all video processed on-device so nothing leaves the phone.
- Wrote a custom three-part neural inference engine in pure Dart that classifies 23 yoga asanas, scores form accuracy, and flags joint-level corrections from 15 computed biomechanical angles.
- Paired the neural model with a deterministic biomechanical rules engine so classifications stay stable even on edge cases.
- Added MET-based live calorie tracking, pose-hold timers, Firebase Authentication, Cloud Firestore profile sync, and scheduled practice reminders.

Nonprofit Donation and Volunteer Platform

React, Node.js, MongoDB

Live: non-profit-organization-website.vercel.app

- Built a full-stack MERN platform linking donors, volunteers, and beneficiaries, with JWT-based authentication and separate donor and admin dashboards.
- Designed an AI matching module that scores applicant skills, availability, and background to surface the volunteers best suited to each mission.
- Integrated Razorpay for UPI, card, and netbanking donations, with dynamic UPI QR generation, automated tax receipts, and a donation history log.
- Built a verified emergency help-request flow — document upload, admin approval, and a public directory of live causes with real-time progress tracking. [\[LINK\]](#)

SKILLS

- Programming Languages: Python, Java, Dart, JavaScript, PHP
- AI, Machine Learning & Data Analytics: Machine learning, deep learning models, computer vision (Google ML Kit), speech and NLP pipelines (Whisper, NLLB-200), prompt engineering, data analytics fundamentals
- Web & Mobile Development: React, Node.js, Express, Flutter, REST APIs, Tailwind CSS
- Databases & Cloud: MongoDB, Firebase (Authentication, Cloud Firestore)
- Testing & QA: Selenium, manual and automated software testing
- Tools & Platforms: Git, AI workflow automation (n8n), FFmpeg, Vercel, payment gateway integration (Razorpay)
- Professional Skills: Analytical problem-solving, cross-functional collaboration, stakeholder communication

CERTIFICATIONS & TRAINING

- Deloitte Australia: Data Analytics Job Simulation, Forage (Issued May 2026)
- Deloitte Australia: Cyber Job Simulation, Forage (Issued May 2026)
- AI Youth Workshop: Prompt Engineering, AI Automation & n8n, Bheemverse Innovation Pvt. Ltd.
- Internship Completion Certificate: Artificial Intelligence, Academor & Flutura
- Certificate of Internship: PHP Development, NOSCE Techno Solutions

LANGUAGES

- English
- Malayalam
- Tamil
